The OM-CP-RFCO2RHTEMP2000A is a wireless data logger that measures and records carbon dioxide, humidity, and temperature levels in a variety of applications. This data logger is ideal for use in air quality studies including HVAC applications and much more.

The OM-CP-RFCO2RHTEMP2000A data logger comes with a 4.9 m (16') cable connected to the CO<sub>2</sub> sensor, making it ideal for placement within enclosed environments such as an incubator to ensure optimum levels. The data logger features an LCD screen which provides instant access to current readings, as well as minimum, maximum, and average statistics. The device also features configurable alarms, battery life indicator, and the ability to reset statistics without impacting the data collection. The logger features a convenient wall mount, while the CO<sub>2</sub> sensor is equipped with dual lock for easy and secure placement and effortless mobility.

Temperature recorded on the OM-CP-RFCO2RHTEMP2000A can be expressed in °C, °F, °R, or K while humidity can be shown in %RH, mg/ml, and Dew Point. Carbon dioxide can be expressed as either ppm or as a percentage. All units can be viewed on both the LCD screen as well as in the software.

The device can be used to determine ventilation efficiency in a variety of environments including buildings, offices, hospitals, schools, and laboratories. By determining the levels of carbon dioxide, improvements can be made to the ventilation systems and energy saving opportunities become more easily identified.

The OM-CP-RFCO2RHTEMP2000A can be used as a single, wireless data logging system, or can be expanded to a large scale system, which can include hundreds of data loggers measuring different parameters (additional wireless data loggers and transceivers may be required). The OM-CP-RFCO2RHTEMP2000A utilizes the latest software. Data can be viewed in graphical or tabular formats and summary and statistics views are available for further analysis. The software features export to Excel®, data annotation, digital calibration and more.
