SKR-204 shown smaller than actual size.

The SKR-203 and SKR-204 are shakers which provide a smooth orbital shaking action with an orbit of 16 mm and speed range of 30 to 300 rpm. These lab scale shakers have powerful shaking but with smooth, quiet motion for long term use and can be used in environmental and CO<sub>2</sub> incubators.

The SKR-203 and SKR-204 are shakers with the same functions and specifications as SKR-201 but are for smaller applications. These mini scale shakers have powerful shaking but are compact size to meet individual uses in small area.

Various tray/platforms are available: The carrier type platform has four rubber cushioned horizontal securing bars with quick release handles and can be easily adjusted both vertically and horizontally to hold most sizes and types of vessels, including flasks, bottles and beakers; the flask tray can hold different size of the flasks by changing the type of clamps.

There are two models to choose from. The digital model SKR-204 provides a digital timer setting up to 9 hours and speed control in 1 rpm increments. The SKR-203 is an analog model which provides laboratories excellent performance at an economical price.
