

TX69 / TXDIN101
Software Loading Instructions

Inserting the CD will usually automatically install the CONCAL software and the CON-COM cable drivers. If it does not please double click the SUomCAL_0.01.0.exe

If for some reason the automatic installation is not successfully performed, please follow the following instructions.

CONCAL manual installation for Windows 98, XP and Vista

1. Please open the "Manual Installation" file
2. Double click the "Set-Up" icon
3. Allow installation although the system might not recognize
4. When relevant, please mark "Create a desktop icon"
5. At the end of the installation press "Finish"

Drivers Installation

1. Please close all the open windows
2. Plug the CON-COM cable to one of the USB ports
3. "Find New Hardware Wizard" window will appear
4. Please mark the "Install from a list or specific location" and unmark "Include this location in the search"
5. Press Next
6. In the next window select "Search removable media"
7. If a warning window will pop up –press "Continue anyway"
8. At the end of the installation press "finish"

Note: Usually, the software automatically searches for the USB port. Some times the PC fails to recognize other ports than the one used for the installation.

Note: The time it takes for the unit to communicate with the PC varies from 5 to 50 seconds, as a function of the previous setting.
