The OM-CP-PRHTEMP101 and OM-CP-PRHTEMP110 are miniature, battery-powered, standalone temperature, humidity, and pressure data loggers. These portable, easy-to-use devices will read and record up to 13,107 humidity, 13,107 temperature, and 13,107 pressure measurements. They represent a major leap in both size and performance. Their real-time clock ensures that all data is time and date stamped. The storage medium is non-volatile solid state memory, providing maximum data security even if the battery becomes discharged.

OM-CP-IFC200, \$129, Windows software displays data in graphical or tabular format.

Data retrieval is simple. Plug it into an available COM port and our easy to use software does the rest. The software converts your PC into a real-time strip chart recorder. Data can be printed in graphical or tabular format and can be exported to a text or Microsoft Excel file.
