- ✓ Ideal for Applications That Require Six or Fewer OMB-DBK Cards

The OMB-DBK10 is an all-metal expansion-card enclosure that accommodates up to three expansion cards for OMEGA's OMB-LOGBOOK and OMB-DAQBOARD-2000 Series data acquisition systems. This enclosure allows three expansion cards to easily slide into it without requiring removal of the signal connections. Two OMB-DBK10's are ideal for applications that require six or fewer expansion cards.

The use of an OMB-CA-37-x cable is required to daisy-chain all cards installed into OMB-DBK10 enclosures.

Packaging. You can stack the OMB-DBK10 beneath an OMB-LOGBOOK portable data acquisition module by means of the included fastener panels. The result is a compact and securely connected data acquisition system that you can conveniently carry from one application site to another.
