

65 AND 150 MM ROTAMETERS OMEGA™

Featuring New Design with Easy Tube Replacement and Superior Readability

- ✓ Up to ±2% Full Scale Accuracy
- ✓ Non-Rotating Seal Spindle
- ✓ Easy-to-Read Scale Design
- ✓ Special Locknut Design for Easy Tube Replacement

The OMEGA® precision variable-area rotameters for air, water, and gases have up to ±2% of full scale accuracy and 0.25% of full scale repeatability. These units feature an easy-to-read millimeter scale and are supplied with correlation charts for air and water. For correlation data for nitrogen, oxygen, hydrogen, helium, argon, and carbon dioxide, please consult the Engineering Department for details. The scale is fused on the metering tube in 1 mm ($\frac{3}{32}$ ") increments, which enables a user to read the flow rate with the highest accuracy.

The special scale design, where a vertical line runs through the length of the scale and intersects the horizontal scale divisions, reduces parallax and eye fatigue, thus insuring high-accuracy readings (see inset, next page). The front polycarbonate shield is also curved to act as a magnifying glass, all of which yields superior performance over other rotameters with standard design.

Easy Flow Tube Replacement

The important advantage of the FL-3600 through the FL-3900 rotameters is their special locknut design, which facilitates the installation and replacement of flow tubes in the field for easy flow range change. The knurled locking nut on top of the tube is backed off with a small Allen wrench or a 1 mm ($\frac{3}{32}$ ") diameter rod, thereby releasing the tube for replacement. The system is designed so that the tube does not rotate while it is tightened into place. Only 2 different standard valves are used: one for flows up to 7000 cc/min of air, the other for higher flow rates. Six different high-resolution valves are used; consult Engineering for details when changing tubes.

Shielded for Pressurized Systems

These rotameters, with precision-bored borosilicate glass metering tubes, are fully shielded against breakage. A white opaque rear shield provides a background to aid in discerning the float position for accurate readings.

Panel Mounting Design

These rotameters are equipped with horizontal ports and NPT threads for easy panel mounting. The ports have external threads and are equipped with panel retaining nuts. No additional mounting hardware is required. Simply drill two holes 131 mm (5.156") apart (center to center) for 65 mm units, 240 mm (9.469") apart (center to center) for 150 mm units. Each hole should be 16 mm ($\frac{5}{8}$ ") in dia.

FL-3600 Series

Optional

SPECIFICATIONS

- Scales:** 65 or 150 mm arbitrary scale
- Accuracy:** ±2% full scale (±5% FS on * models)
- Repeatability:** ±0.25% full scale
- Connections:** $\frac{1}{8}$ FNPT, horizontal
- Flow Tube:** Borosilicate glass
- End Fittings:** Anodized aluminum or 316 SS
- Side Panels:** Aluminum
- Valve Orifice:** Polyacetal for aluminum models, Kel-F in 316 SS models
- O-Rings and Packings:** Buna in aluminum models, FKM in 316 SS models
- Packings:** FKM
- Float Stops:** PTFE
- Maximum Temperature:** 121°C (250°F)
- Maximum Pressure:** 200 psig (13.8 bar)

FL-3607G, shown close to actual size.

Rotameters with 65 mm Flowtubes

Polycarbonate shield acts as a magnifier to insure high accuracy reading with less eye fatigue.

Comes complete with correlation sheets for air and water with instructions printed is on the back.

“G” suffix denotes glass float,
 “ST” suffix denotes 316 SS float,
 “C” suffix denotes carboly float,
 “SA” denotes sapphire float.

For units without valve, add suffix “-NV” to model number.

Minimum flow rate is 10% of the maximum rate shown.

†† New flow rates effective for purchases after March 1, 2013.

For 16-turn, high-resolution, non-rising stem valve for 150 mm rotameters, add suffix “-HRV” to model number, for additional cost

For NIST calibration, add suffix “-NIST AIR” to model number for additional cost. Add suffix “-NIST WATER” to model number for additional cost.

For oxygen cleaning add “-02CLEAN” to model number for additional cost.

Ordering Examples: **FL-3940ST**, 150 mm rotameter, 16-turn, high-resolution, non-rising stem valve stainless steel unit, with 316 SS float, range of 41.5 LPM/air, 1.28 LPM water
FL-3802C, 150 mm rotameter, non-rising stem valve aluminum unit, with carboly float, range of 1222 cc/min air, 33.7 cc/min water.
