# 1⁄8 DIN Multisignal 

 $\Omega$ OMEGA
## Panel Meter <br> Economical Panel Meter for Process, Temperature and Electrical Measurement

OMEGA's new multisignal panel meter delivers high-performance in a $1 / 8$ DIN size for panel mounts and integration in a wide range of applications. The DP20 accepts universal inputs, including thermocouple, RTD, process (mA \& Vdc), resistance, frequency and true RMS voltage and current. By configuration, it will work as an AC and DC voltmeter (up to 600 V ) and AC and DC ammeter (up to 5 A) offering application flexibility for process control and industrial requirements. A single universal power supply allows this unit to be suited for global use.

The optional relays, analog output, and Modbus ${ }^{\circledR}$ RTU serial communications provide customization, control and communication capability. Additional features of the economical DP20 panel meter include scaling, NEMA 4 (IP65) protection, and programmable decimal points.

[^0]
## APPLICATIONS

$\checkmark$ Assembly Line
$\checkmark$ Control Panel
$\checkmark$ Laboratory
$\checkmark$ Reading Offset-Configure a Fixed Number of Counts to be Added to the Reading
$\checkmark$ Second Scaling Function-Define Two Scalings for the Same Signal and Control (One is Active with the 'External Control’ Option)
$\checkmark$ Recursive Display Filter for Noisy Signals and Configurable Steps for Minimum Predefined Changes on the Reading
$\checkmark$ Output and Control Options: 1 or 2 Relay Outputs, 1 Analog 4 to 20 mA Isolated Output, 1 Modbus RTU Isolated Serial Output
$\checkmark 5$ Levels of Brightness Intensity
$\checkmark$ Password Protection

## Specifications

Digits: 4
Reading: 9999/-1999
Decimal Point: Configurable
LED Color: Red
Digit Height: 14 mm (0.55")
Accepted Signal Ranges: See tables at page 4 for more information

AC Voltages and AC Currents: $600 \mathrm{Vac}, 200 \mathrm{Vac}$, $20 \mathrm{Vac}, 2 \mathrm{Vac}, 200 \mathrm{mVac}, 60 \mathrm{mVac}, 5 \mathrm{Aac}, 20 \mathrm{mAac}$ (True RMS measure) (accepts phase-neutral and phase-phase measure)
DC Voltages and DC Currents: $\pm 600 \mathrm{Vdc}, \pm 200 \mathrm{Vdc}$, $\pm 20 \mathrm{Vdc}, \pm 2 \mathrm{Vdc}, \pm 200 \mathrm{mVdc}, \pm 60 \mathrm{mVdc}, \pm 5 \mathrm{Adc}$, $\pm 20 \mathrm{mAdc}$
Thermocouples: K, J, E, N, L, R, S, B, T and C
(automatic cold junction compensation)

## Probes:

Resistive 'Pt' Probes: Pt100 with 2 and 3 wires, Pt500, Pt1000
Resistive 'Ni' Probes: Ni100, Ni200, Ni1000
Resistive NTC Probes: See table at page 4
Resistive PTC Probes: Families KTY-121, KTY-210 and KTY-220
Process: 4/20mA, 0/10Vdc
( +15 Vdc excitation voltage configurable at terminal 5)
Resistances: Ranges $0 / 5 \mathrm{~K}$ and $0 / 50 \mathrm{~K}$
Potentiometers: With nominal values from 500 R up to 20 K
Frequency up to 100 Hz (minimum 15 Hz ), Vac and Aac ranges
Thermal Drift Offset+Span: $150 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$
Readings: 3 readings/ second

Refresh: 3 readings/ second
Response Time: <300 mSec. (0\% to 99\% of signal)
Power 'U': 18 to $265 \mathrm{Vac} / \mathrm{dc}$ (isolated 1500Veff @ 60 seconds)
Output and Control Options:
1 or 2 Relays
1 analog output $4 / 20 \mathrm{~mA}$ isolated
1 Modbus RTU isolated serial output
Protection: NEMA 4 (IP65)
Consumption (Normal Mode): <1.0 W (meter only) <2.5W (meter with options)
Consumption ('Eco' Mode): <0.3 W (meter only) <1.5 W (meter with options)
Connections: Plug-in screw terminals
Weight: < 150 g ( 5.3 oz )
Operation Temperature: 0 to $50^{\circ} \mathrm{C}\left(32\right.$ to $\left.122^{\circ} \mathrm{F}\right)$

Internal Structure - Jumpers for Input Range Selection

## Connections and Rear View

## Options

## Relay outputs

## Analog output

Module . . . . . . . . M1
Function . . . . . . . 1 analog output isolated $4 / 20 \mathrm{~mA}$ isolated 1000 Vdc

## Modbus RTU output

Module

S1

Function . . . . . . . 1 Modbus RTU output 9,600 bps, 4,800 bps isolated 1000 Vdc

Input Signal Ranges - Technical Specifications

| Vac ranges (Veff.) | Scale by default | Scalable | Jumpers | Jumpers | Accuracy (\% FS) | Max. Oversignal | $\mathrm{Z}_{\text {in }}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\sim 600 \mathrm{Vac}$ | 600 | $\begin{gathered} \text { from } 9999 \\ \text { to }-1999 \end{gathered}$ | G I | 4-5 | $\begin{aligned} & <0.30 \% \\ & \text { (up to } 150 \mathrm{~Hz} \text { ) } \end{aligned}$ | 800 Vac | 12 M |

Maximum oversignal is the maximum signal accepted by the instrument. Higher signal values may cause instrument damage. Lower values are not destructive but may be out of accuracy specifications.

| To Order |  |
| :---: | :---: |
| Model No. | Description |
| DP20 | $1 / 8$ DIN multisignal panel meter with universal 18/265 Vac/dc power supply |
| DP20-A1 | $1 / 8$ DIN multisignal digital panel meter with universal $18 / 265 \mathrm{Vac} / \mathrm{dc}$ power supply with 1 relay output |
| DP20-A1-A2 | $1 / 8$ DIN multisignal digital panel meter with universal $18 / 265 \mathrm{Vac} / \mathrm{dc}$ power supply with 2 relay outputs |
| DP20-M1 | $1 / 8$ DIN multisignal digital panel meter with universal $18 / 265 \mathrm{Vac} / \mathrm{dc}$ power supply with 1 isolated 4 to 20 mA analog output |
| DP20-M1-A2 | $1 / 8$ DIN multisignal digital panel meter with universal $18 / 265 \mathrm{Vac} / \mathrm{dc}$ power supply with 1 isolated 4 to 20 mA analog output and 1 relay output |
| DP20-S1 | $1 / 8$ DIN multisignal digital panel meter with universal $18 / 265 \mathrm{Vac} / \mathrm{dc}$ power supply with 1 isolated Modbus RTU output |
| DP20-S1-A2 | $1 / 8$ DIN multisignal digital panel meter with universal $18 / 265 \mathrm{Vac} / \mathrm{dc}$ power supply with 1 isolated Modbus RTU output and 1 relay output |

[^0]:    $\checkmark$ Fast Access Menu—Front Key Access to Modify the Alarm Setpoints and Max/Min Memory
    $\checkmark$ External Control Function-Contact at Multifunctional Terminal 5 (Second Scaling, Decimal Point Change, 'Hold' the Reading Tare or Activate the Max/Min Memory)
    $\checkmark$ Automatic, Power Saving Eco Mode
    $\checkmark$ Alarms 1 or 2, Independent, Configurable as Max/Min, with Setpoint and Hysteresis
