The HH-DM electronic distance measurement tool sends out narrow beams of sound waves that "bounce" off solid objects back to the hand-held receiver. Custom electronics and a microprocessor then convert elapsed time into a distance measurement and display it on the LCD.

The HH-DM is the perfect accessory for OMEGA's OS530 infrared pyrometer. The HH-DM mounts directly on top of the HH-DM to provide one complete solution for non-contact temperature and distance measurement. (See the related links section below for more details on the OS530 infrared pyrometer).
